

Bringing communities together to build a sustainable future

Sustainable multi purpose accommodation solutions.

- > Build a community fast using your trained community
- > Using local talent to build a safe haven (accommodation facility)
- > Utilise government funding to assist locals in building a safe community
- > Build workers accommodation fast using local resources and then can be transformed into a safe haven for locals

Extending the value of your corporate investment to help build communities

iSupply Modular presents an innovative solution to address the current housing crisis in remote communities by turning infrastructure projects into communities.

- Maximizing the impact of your corporate investment by contributing to community development
- Reducing waste through repurposing but also contributing to the availability of affordable housing
- Creating jobs and adding ongoing value to aboriginal communities
- Providing spacious donga accommodation for workers
- Extending beyond the lifespan of any single project by reusing workers accommodation for indigenous communities
- Helping to build indigenous skills and fostering a legacy of community enrichment
- Contributing towards your Reconciliation Action Plans (RAPs) targets
